Interactive Rooms

- Oxford (6), Tupelo (6), DeSoto (6), Booneville (3), Grenada (1)
 - Each room has a slightly different layout.

Scopia Desktop

Common uses:

- Guest speakers
- Teaching from home/out of town
- Students who cannot attend class

Wimba Classroom

The screenshot displays the Wimba Classroom interface within a Windows Internet Explorer browser window. The main content area shows a poll question: "Do you see a possible use for Wimba?". Below the question, there are three radio button options: "Yes", "No", and "Maybe", with "Don't know yet" selected. A "Submit" button is located below the options. On the left side, there is a "Responses" section showing "0 0%" and a "Results" section with "Preview" and "Publish" buttons. On the right side, there is a "Content" section with "Web", "eBoard", and "Share" buttons, and a "polls" dropdown menu. Below the poll, there is a "Reset Content Frame" section with three poll options: "1- multiple-choice", "2- open-ended", and "3- multiple-choice". At the bottom right, there is an "Archive Reminder" section asking "Do you want to archive this presentation?" with "Yes" and "No" buttons. The bottom of the interface features a chat window with a "TALK" button, a list of participants (including "uncapher"), and a "Wimba people teach people" logo.

- Used outside of compressed video
- Set up in Blackboard
- Video
- Voice
- Text chat
- Powerpoint
- Desktop share
