Text: Calculus, second Edition by Smith and Minton

1. There will be five (5) major tests during the course. Each test will count 100 points. The test questions will be similar in format to the examples in the book, the homework problems, and the material from class. At the end of the semester, the lowest test grade will be dropped.
2. There will be a 100 points quiz/homework grade. The quizzes will be worth 50 points. I'm shooting for 7 quizzes, and I drop 2. The homework is worth 50 points. I'll start taking up homework for a grade after the 1st test. I assign the homework in class (so go to class!!).
3. **There will be a final examination over the material covered during the course. The final examination will count 200 points.**

FINAL GRADE: The cumulative point total for the tests, quizzes, and final examination is 700 points. The following point scale will be used to determine your final grade.
