

John,

Some of the following actually happened...

I decided to handle this history in much the same way Tacitus or Suetonius might have... in an extremely biased and twisted manner. I also decided to cover just the first three years since Bambi will likely cover years three and four when she writes her bit which will be the lead up to and first year of baronial status.

I didn't mention absolutely everyone, mostly because as we got larger and larger not everyone did something that impacted the highlights of the events related here, although I think everyone contributed to the group that was. You'll note I didn't mention the near-weekly parties at my house where Gordon and I would sing for hours. And I'm sure I left out names I couldn't recall. For example there were four of us to drive down to John's investiture as Prince, but I forgot the name of the fourth even though I recall he borrowed a costume from me.

The main reason I stopped where I did was I noticed my style had gotten very modern and less funny. One more year and it would probably be boring too.

I'll think about this and if I come up with anything new I'll send it down.

Peace,

Yosef/Jon

PS if anyone is interested my fictional writings are available for free at [www.sc2.com/e-books](http://www.sc2.com/e-books)
