Major Construction Areas Affecting Traffic-Parking-Pedestrian Flow
Fall 2013
(updated Nov. 13th)

- Chapel Lane - between the entrance to Magnolia Row and Dormitory Row West. Expansion and construction of Johnson’s Commons will keep this section of Chapel Lane closed to traffic. All traffic for Dormitory Row West must approach from Rebel Drive and Dormitory Row North.

- Renovations will continue on Lamar Hall. Some parking is designated as construction Vehicles only. Obey signage - violators will be cited and towed.

- University Avenue at All American The roadway and intersection are not blocked but the sidewalk in front of Coulter Hall is not available for use. Be cautious in this area as pedestrian traffic will cross into the roadway.

- Expansion of the Thad Cochran Research Center will continue. Expect traffic delays and occasional road closure due to materials deliveries. The sidewalk on the north side of All American will remain closed – pedestrians should proceed with caution.

- Construction will continue with the expansion of the Indoor-Practice-Facility (IPF). Expect minimal impacts to traffic flow in this area with the exception of the occasional materials delivery blocking East Stadium Drive. Note that Manning Way now extends from Hill Drive to Gertrude-Ford Blvd.

- Construction for the new Parking Garage will begin in late December and is located just west of Vaught-Hemingway Stadium. The construction in this area will be phased and eventually will expand to include the new Arena site. Some parking in the area will be reallocated and traffic delays may occur with materials deliveries.
