EXECUTIVE SUMMARY

Users enter at Stage 1; after stage 1 users can move through all other stages or modules but will be directed to a relevant stage or module should there be missing information. At each stage, the example options given represent a non-exhaustive list of criteria that may be revised, altered, or extended in the future as part of system maintenance.

Stage 1: Project Parameters
- Time
- Purpose
- Audience
- Method of delivery

Quiz Component: After stage 1, upon the user moving to any other stage, one quiz question will be presented. The question will be pulled from a pool of questions (i.e., quasi-randomly generated within this stage).

Stage 2: Design Principles
Derived from Stage 1, (purpose, audience, method of delivery)

Quiz Component: During stage 2, after user has clicked on a few of the pages (random number between 1 and 5), one quiz question will be presented related to the relative outcome. The random number resets after the first question and a new question will be presented when an additional 1-5 pages have been viewed, and so on. Each question will be pulled from a pool of questions (i.e., quasi-randomly generated within this stage).

Stage 3: Guided Tool Selection
Derived from Stage 2 (appropriate design principles)

Quiz Component: After stage 3, upon the user moving to any other stage, 2-3 quiz questions will be presented. Each question will be pulled from a pool of questions (i.e., quasi-randomly generated within this stage).

Stage 4: Output & Storage
- Project At-A-Glance
- Project Summary

Supplemental Module 1: Information Input
- Uploading documents
- User notes and sources

Supplemental Module 2: Showcase

Supplemental Module 3: Quizzes
